Hayfever

- Hayfever (also known as allergic rhinitis) is an allergic reaction that happens when your immune system responds to an allergen (a substance you are sensitive to).
- Hayfever causes symptoms such as sneezing, a runny nose and watery, itchy eyes.
- It can be triggered by seasonal allergens like pollen and grass, or year-round triggers like dust mites and animal fur.
- Most people manage hay fever by avoiding allergens and using medicines, such as antihistamines and nasal sprays.
- Allergy testing can help to identify potential triggers for hayfever.

We have products for all your hayfever symptoms— tablets, eye drops & nasal sprays.

Talk to our friendly staff to find a suitable product for your hayfever symptoms.

DUKES Weight Loss Shakes

Dukes® is an effective Australian weight loss system. Our Shakes are both healthy and nutritionally complete, designed as meal replacements to substitute for one or two main meals daily. Each meal is not only delicious but also keeps you feeling full and satisfied. Ultimately, the Dukes® Weight Loss Program works because it reduces the number of calories you eat per day. This results in you being in a calorie deficit meaning your body needs to burn body fat instead of relying on the energy (calories) from food.

The high protein content, fibre plus vitamins and minerals make them safe and effective for rapid weight loss.

Choose from Apple & Cinnamon, Chocolate, Cinnamon Donut, Mixed Berry or Vanilla Flavour.

30% off until 21st November!
