With the weather cooling down we are seeing many customers presenting with cough and cold symptoms. We have a range of products to help ease your symptoms. Please see our friendly staff for assistance.

We do also want to remind everyone that if you suspect or have a confirmed case of Covid you need to self-isolate and we can deliver to your car outside or to your home.

Our Catalogue runs from 14th July–5th August. Purchase any item from the catalogue and enter online to WIN a SONY X Series Portable Speaker valued at \$655

Healthy regards,

Brendon, Emma & Justine

Food and heart health myths.....busted!

Coconut oil is a healthy superfood.....?

Coconut oil has been the centre of a raging debate recently. Named by some as a superfood, does it deserve this title?

Coconut oil contains 92% saturated fats. It is a slightly different type of saturated fat to that found in animal products but it is still not a healthy option.

Like butter, coconut oil raises both good (HDL) and bad (LDL) cholesterol levels. The rise in bad outweighs the benefit of the rise in good cholesterol.

Can coconut oil be part of a healthy diet? Only a little and only sometimes. Swap coconut oil for other cooking oils such as olive oil.
