Electronic Prescriptions

Have you noticed the new type of prescriptions?

Recently e-scripts (with QR codes) have been rolled out across Australia. This enables a paperless form of your script to be issued by your Doctor.

About half of the Doctors in Inverell are using e-scripts.

We encourage all our customers to allow us access to their ASL (Active Script List). ASL is a digital (computer and internet) list of your electronic scripts (e-scripts).

With consent we can see all your active scripts (including repeats) and "pull them from the cloud" to dispense your medicine for you.

We expect this system will reduce the volume of paper scripts customers will have to manage.

For our customers for whom we file repeats, we expect it will streamline accessing your scripts. Less fussing with paperwork means prompt dispensing for you!

There are stringent safeguards for security and privacy with this system.

We are confident it is safe.

If your Doctor issues e-scripts, we will be asking for your consent to access your script list.

Any of the staff will be happy to answer any question about e-scripts and ASL.
